Kristine-

At your 5/8/06 meeting I understand you and Jim Anderson agreed on the following points concerning DEQ's Source Control Decision (SCD) for the Ro-Mar Site:

1. The SCD is predicated on the assumption that there is not a complete contaminant migration pathway from the undeveloped eastern parcel to the developed western parcel. Particularly that soil contamination from the eastern parcel is not expected to be transported to the western parcel via overland runoff.
2. The storm water migration pathway is potentially complete from the western parcel to the Willamette River, since there are operations on the western parcel and the storm water conveyance system discharges to the International Slip on the Willamette River. However, the SCD indicates that this potential pathway is a low priority and no source control measures are required.

Please confirm your agreement on these two general points. If so, DEQ will finalize the SCD for this site.

Thanks-

Tom Gainer

NWR DEQ

Subject: Response to EPA comments on Ro-Mar

Kristine,

Here is DEQ's response to EPA comments on the DEQ's draft SCD for the Ro-Mar site. Please review & let's plan on discussing & resolving in our 5/8/06 meeting. I'll send you a hard copy in US mail.
